

WICHITA MARKETS.

The Receipts of Stock at the Wichits Union Stock Yards for the past 24 Hours Were as Follows: 492 Cattle 820 Hogs, Shipments: None.

WICHITA, May 23. The cattle market had more life in it today than at any other time during the week. There was no good butcher stuffs in, but buyers and sellers managed to agree on prices for the medium grades, and consequently trading was more lively. There were several bunches of good stockers in, which went off at good prices. Anything good would have sold well. The butchers were very much disappointed in not getting some killing cattle. They would have paid top prices for a goo number of the right kind of stuff. The common, medium and fair grades of cattle vere unchanged. Good stuffs were strong.

REPRESENTATIVE SALES.

Description.

Hog receipts were fair for Saturday. Quality was some better than the average run yesterday. The local packer demand was strong and would have taken a few hundred more good packing hbgs. The market opened steady to strong and remained so all day. All offerings went over the scales early. As yesterday there was very little sorting done, and but a very small showing of pigs and lights. Tops brought \$4.40; bulks, \$4.30@4.35; pigs, \$3.25 @3.50. The market closed firm.

THE STORMY PETREL.

How Mother Carey and Her Chickens Range the Sea. Mother Carey's chickens are among the smaller species of the petrel family, all of which are distinguished by a peculiar tube-1891 like arrangement of the nostrils. Their feet also are peculiar in being without any back toe, so that they can with only great difficulty rise on the wing from dry land. Mother Carey's chickens have both ashorter bill and a longer leg than their relatives. But all the procellarize are noted for rang ing further from land than any other of the seabirds. Thus they are often visible from shipboard when no other animal life can be sighted, and thus it was, doubtless, that their appearance suggested safe harbor, and consequent thanks to Mater Cara, to

the devont seaman. Why the petrels are associated with storms is not thus easily explained, seeing that they are abroad in all weathers, but a supposition was advanced by Pennant. It is that they gather from the water sea animals which are most abundant before or after a storm, when the sea is in a state of unusual commotion, All birds are highly sensitive to atmospheric changes and all seabirds seem to show extra activity in threatening and "dirty" weather. There is another interesting thing about Mother Carey's chicken, and that is, that he is also called petrel, from the Italian Petrello, or "Little Peter." This is because he is supposed to be able, like the apostle, to walk on the water, as in fact he does with the aid of his wings.

Children Cry for Pitcher's Castoria.

Winter is not the only pleasant season in California. All months are equally de-lightful if in summer one is located near the coast. The co-called "dry season," with its bright, sunshiny days and health-giving ozone, just suits invalids and parties needing an out-of-door life, Santa Fe route runs low excursions every week to Pacific coast. Inquire of agent A. T. and S. F. B. R., 122 N. Main street and passenger station, Douglas and Fifth avenues.

Hereafter passengers leaving Wichita on the Missouri Pacific fast through train at 120 p. m., for St. Louis or points east of Fort Scott, will enjoy the benefit of hav-ing supper served in a dining car at Fort Scott at 7:25 p.m. Likewise passengers leaving St. Louis at 8:20 p. m. will be served breakfast at 7:26 a. m. in the same served breakfast at 7:25 a. m. in the same way. Thus is the ""easant Hill route" becoming more popt.ar daily with the travelling public. E. E. Bleckler. Passenger and Freight agent, Missouri Pacific Railway, 120 North Main.

In a recent magazine article, Mr. Ernest Ingersoll, the noted writer, says:

"The climate of Southern California in winter closely resembles that of Egypt. Its equability is constant, and its dryness is proverbial. The only complaint made is that it is too nearly perfect. Residents bred in the eastern states confess now and then that a rousing storm would give them a grateful sensation. But this sentiment meets with no favor from the man who has just fled from a superfluity of wetness and chilling gales. To him perpetual summer seems perpetual paradise, and to the invalid dreading the advance of disease, the still, arid atmosphere is as the breath of Rock Island Route to the Pac
